Consulting Services

Implementing production management related software solutions require a comprehensive knowledge on both in the field of production processes and modern software technologies. If an enterprise wants to outsource such a project, it requires having an experienced consultant who must be dominant in both fields.

Having experts in both fields the IYI Co. can consult enterprises on preparing contract details, technical description and writing RFP of the projects. Moreover, our highly experienced staff can assist owners on implementing production management system resulting in the integrity of data and information of the production process.
